

REBECCA HAVENS GORE

Principal Design Systems Lead

Austin, TX becca.h.gore@gmail.com <https://becca-havens-gore.github.io/design-system>
[linkedin.com/in/rebecca-havens-gore](https://www.linkedin.com/in/rebecca-havens-gore)

SUMMARY

Principal Design Systems Lead with 13+ years of experience architecting, scaling, and governing design systems across enterprise platforms. Track record of building systems from zero — and overhauling them at scale — at Rapid7, AlphaWave, and Kronologic. Deep expertise in component architecture, token infrastructure, WCAG AAA accessibility, cross-functional governance, and Figma-to-code workflows (Supernova, MCP). Specialization in designing for technical, high-stakes operational environments where consistency and trust are non-negotiable.

CORE COMPETENCIES

- Design Systems Architecture (0–1 and 1–10)
- Component Library Design & Governance
- Design Tokens & Theming Systems
- Figma-to-Code (Supernova, MCP, MUI)
- WCAG 2.2 AAA Accessibility
- Contribution Models & Documentation Standards
- Adoption Measurement & System KPIs
- Platform & Enterprise UX
- Data Visualization Systems
- AI Experience Design
- Designer Enablement & Mentorship
- Cross-Functional Stakeholder Leadership

PROFESSIONAL EXPERIENCE

Principal Design Systems Lead / Staff UX Designer | *Rapid7* Jan 2021 – Present

Design systems architecture, platform UX, and AI experience standards for a cybersecurity SaaS platform serving 10,000+ enterprise customers.

- Architected and led the R7 Design System (RDS) and full MUI migration end-to-end: defined token infrastructure, component taxonomy, theming, and accessibility standards; drove 80% platform adoption across 40+ product teams and achieved 100% WCAG 2.2 AA compliance.
- Increased engineering implementation speed by 40% through Figma-to-code parity model built on Supernova, eliminating handoff ambiguity and enabling component-level documentation at scale.
- Established the Design Governance framework — contribution model, Design Forum review process, proposal templates, and quarterly audits — reducing design drift across a fragmented multi-product platform and improving accessibility compliance by 40%.
- Designed and scaled the Data Visualization System (DVS): unified chart library, interaction patterns, and accessibility standards for dense operational security data; cut design time by 60% and improved dashboard engagement by 30%.
- Built the Unified Platform Experience, standardizing tables, filters, and batch actions across six products; improved UX consistency by 50% and task success rates by 28%.
- Authored Rapid7's AI Experience Standard: six responsible AI principles and twelve reusable UX patterns covering trust models, explainability, attribution, and permissions frameworks for AI-powered features.
- Led Designer Enablement program: 100+ sessions, structured curriculum, and AI-assisted learning tools for a team of 30+ designers.

Lead UX Designer & Design System Architect (Contract) | *AlphaWave* 2020 – 2021

- Built AlphaWave's design system from zero as sole designer: audit, token architecture, component library, documentation, and handoff workflow in a single engagement.
- Delivered a production-ready system adopted by engineering immediately; work recognized externally by SC Labs.
- Established Figma standards, design language, and interaction patterns that persisted as the product's design foundation post-contract.

Senior UX Designer (Contract) | *Kronologic* 2020 – 2021

- Rebuilt the product's entire UI foundation on Ant Design (AntD), modernizing a legacy interface and establishing a consistent component library from the ground up.
- Defined interaction patterns, visual standards, and component specifications that aligned design and engineering on a shared implementation model.

Senior UX Designer / UX Designer II | *Rapid7* Apr 2016 – Dec 2020

- Led UX for the DVS MVP — the first unified data visualization layer across Rapid7's security platform — establishing foundational chart standards and dashboard patterns.
- Defined cross-product filtering, querying, and drill-in interaction patterns adopted as platform-wide standards.
- Contributed to the 2019–2020 Platform UX Vision and Experience One initiative, laying the architectural groundwork for what became RDS.

UX Designer | *Bypass Mobile* Jul 2013 – 2016

- Designed mobile and tablet POS, ordering, and operations experiences for major stadiums and event venues; developed early reusable component patterns that reduced visual inconsistency across deployments.

EDUCATION

MS in Information Studies (MSIS)

University of Texas at Austin · 2011–2013

Focus: Information Architecture, Retrieval, Data Visualization

BA in Medieval & Renaissance Studies

Vassar College · 2004–2007

TOOLS & TECHNOLOGIES

Figma · Supernova · MUI · Ant Design · Storybook · FigJam · Framer · GitHub · Jira · Confluence · Claude · Pendo · Dovetail
